Here is a brief introduction of some advanced technology you will be offered the day of your visit:

optomap[®]

Retinal Exam

www.optos.com

The Optomap is fast, painless, and comfortable. Your doctor will be able to compare each year's Optomap images of the inside of your eyes to discover any subtle change and monitor your continuing eye health.

TOPCON

www.topconhealthcare.com

The Topcon Maestro2 OCT (Optical Coherence Tomography) is an advanced medical imaging device designed to provide high-resolution, cross-sectional images of the retina and other structures of the eye. It is utilized for diagnosing and managing various ocular conditions such as macular degeneration, glaucoma, diabetic retinopathy, and retinal detachments.

Maestro2 is the user-friendly OCT + Fundus Camera system that automatically performs alignment, focus and capture with a single touch; making your visit as smooth as possible.
